Eko Black

Reggranulate is sourced from waste from our internal production and other industrial sources. The trolleys in this series are produced in black.

Eko Color

These trolleys are made of reggranulate from other industrial waste in a neutral colour. With these materials, customers can choose from 8 standard colours and others on special request.

Save the Sea

We use recycled plastic from waste fished from the seas and oceans. Due to the specific nature of the reggranulate obtained in this way, the trolleys and baskets are graphite-coloured.

Glamour

This is a special version of trolleys made of polycarbonate. The main feature of this material is transparency and elegance. The trolleys are unique and exclusive.

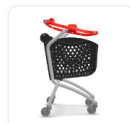

86 L – Twinst Basket

TWINST Basket is a twin model of the TWINST Bag, but with a basket made from 100% recycled plastic. Available in Eko Black and Save the Sea colours.
